

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW EMERGENCY USE
OF A REGISTERED AGVET CHEMICAL PRODUCT**

**FOR THE CONTROL OF
ANTHRACNOSE AND PANICLE AND SHOOT BLIGHT
IN PISTACHIOS**

PERMIT NUMBER – PER80710

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 11 OCTOBER 2015 TO 31 AUGUST 2018.

Permit Holder:

PISTACHIO GROWERS AUST INC
C/O AgAware Consulting Pty Ltd
21 Rosella Ave
STRATHFIELDSAYE VIC 3551

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

PRISTINE FUNGICIDE

Containing: 252 g/kg BOSCALID & 128 g/kg PYRACLOSTROBIN
as its only active constituents.

Directions for Use:

Crop	Diseases	Rate
Pistachios	Anthracnose (<i>Colletotrichum</i> spp.), Panicle and shoot blight (<i>Botryosphaeria</i> spp.)	80 g/100L or 800 g/ha

Critical Use Comments:

- Apply as a protectant spray by airblast sprayer, knapsack or equivalent.
- Make first application during early bloom. Repeat application if conditions remain favourable for disease development.
- DO NOT apply more than 3 applications per crop & DO NOT exceed 2 consecutive applications of Pristine Fungicide allowing a minimum re-treatment interval of 10 days between those consecutive applications. Prior to applying a third (and final) application of Pristine Fungicide rotate with another fungicide from another chemical group for 2 at least applications.

Withholding Period:

DO NOT harvest for 14 days after application.

Jurisdiction:

All States.

Additional Conditions:

This Permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Export of produce:

To allow treated produce to be supplied or otherwise made available for human consumption Temporary Maximum Residue Limits (TMRL) have been established for Boscalid and Pyraclostrobin covering the commodity Pistachio nut at 2mg/kg and 1mg/kg respectively. These MRLs applies only to produce marketed and consumed in Australia. If treated produce is to be exported, due account should therefore be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing country.
