

ON FARM ~~WASTE~~ — RESOURCES

Stewart Ford

Responsibility and Risk

We all want clean farms and environments. We all want better reputations and access to funding and markets.

We don't all share the RESPONSIBILITY OR RISK.

Farmers are currently burdened with disposal responsibility and risk which is not theirs.

Responsibility sits with the Brand Owner (under NEPM) but risk if not shared by the Brand Owner sits with Farmers. Eg. SA potential fine of \$2M or 4 years imprisonment.

Resource

Waste plastic when recovered is a viable resource for recycling.

1 x bulk bag = 1 school seat. In 1 hour

1 ha dam = 64.8T of evaporation discs = increase yields (algal suppression)

Since 2015 here to help you.
